Thalass (a name inspired by "*thalassa*," meaning "sea" in Greek) is the proprietary method for art glassmaking created by Alessandro Di Rosa. It was inspired by the influence of ancient Greek culture on Sicily — where Alessandro was born and raised — as well as the Mediterranean sea. Today, the Thalass collections aim to represent the primary expressions of Nature with a distinctive "instinctual" touch. Thalass glass pieces are artworks designed for everyday use, but also to be collected and treasured for generations.

Alessandro
Di Rosa

photo by Simone Aprile
drawing by Fabrizio Foti Architetto

Creating a Thalass glass
piece is our way to make
our dreams alive

A Thalass glass piece
is where the visions
of its creators and its
collectors meet

It is easier to recognize
a Thalass glass piece
than it is to make one

Our artworks are
made in our shop.
It all starts with a
sketch, the gateway
into our world

An “island of glass”
comes out of the
diamond cutting,
and a new decorative
landscape is born

A world of shapes, all handmade

Thalass is a Renaissance-inspired shop, where every single step of production is done from scratch by our glass masters.

Our hand-molded shapes are each unique and determine the overall quality, hence durability and hand feel of our glass.

No Thalass
artwork
resembles
another, as
each piece is
handmade one
by one

Our colours are made of very precious pigments, which imbue Thalass's one-of-a-kind glass with its own look and feel

Every one of our glass masters decorates by following an artistic model, but each artisan's hands give every Thalass glass piece its own distinctive character

Thalass is
research in
form and
colour, for an
everlasting beauty

Thalass
is passion
for painting

Thalass is rhythm

Thalass is restless
experimentation

Thalass production techniques create artworks that you can live with and love over time

Although Thalass glass is a totally artisanal product, it has been created to be second to none in terms of quality and professional performance.

- Thalass has its own density and “touch,” a quality you can feel.
- Thalass is harder and more resistant to shocks than average glass pieces, thanks to its unique fire and cooling techniques.
- Thalass does not crack or chip, if properly handled.
- Thalass cleans up in a breeze.
- Thalass is hygienic and odor-free due to its smooth surface, inhibiting bacteria proliferation.
- Thalass is nontoxic, thanks to our own decoration technique.

Thalass among the stars. More than 25

Thalass is also part of the decorative research of fine dining establishments awarded by the Michelin guide. So far, more than 25 Michelin stars have been bestowed on Thalass collectors.

About the Thalass quality and how to take care of it

Thalass should not be exposed to sources of heat, including microwaves.

Care directions:

Dishwasher: always follow the glass-washing program and do not wash at more than 75° Celsius.

Hand wash: gently rub with soapy water and a gentle sponge or microfiber cloth. Never use aggressive detergents or scratchy sponges or brushes.

Avoid contact between glass pieces both when washing and storing. Always store by avoiding contact from one piece to the other, by using separators, whenever possible. Stack a maximum of 5 Thalass glass pieces at a time.

How to read this book and order your Thalass pieces

In this catalogue you will find all of the Thalass hand-molded shapes; each of them has been photographed with one of the more than **300 Thalass glazes available**.

Next to each shape design, you will find a technical sheet with the related measurements, weights and code. The latter will always be included as a reference for your order, to easily identify the shape of your choice.

IMPORTANT:

the photographs you will see in the rest of the catalogue showcase the shapes when decorated.

To choose the most suitable glaze to decorate the shape of your choice, please use our GLAZE BOOK
