“Thalass”, dal greco antico *Thalassa*, è il nome del metodo di lavorazione del vetro creato da Alessandro Di Rosa. Da una iniziale ispirazione tratta dal mare e dalle sue culture, oggi le collezioni Thalass raccontano tutto l’universo naturale attraverso l’espressione primaria dei suoi elementi. Nati per raccontare la bellezza degli istinti, gli oggetti di Thalass sono vere opere d’arte per il quotidiano, da collezionare e tramandare nel tempo.

Thalass è la materia
attraversata dal sogno

Su un vetro Thalass
si incontrano le visioni
di chi lo crea
e di chi lo colleziona

Riconoscere un'opera
in vetro Thalass è facile
tanto quanto è complessa
da realizzare

Le nostre opere
nascono in bottega.
Tutto comincia da un disegno:
la traccia che apre i confini
del mondo Thalass

Dal taglio al diamante
si crea “l’isola di vetro”
su cui dare vita a
un nuovo paesaggio
decorativo

Un mondo di forme, tutte fatte a mano

Quella di Thalass è una bottega di ispirazione rinascimentale. Fin dal principio, ogni passaggio creativo nasce dalle mani dei suoi maestri.

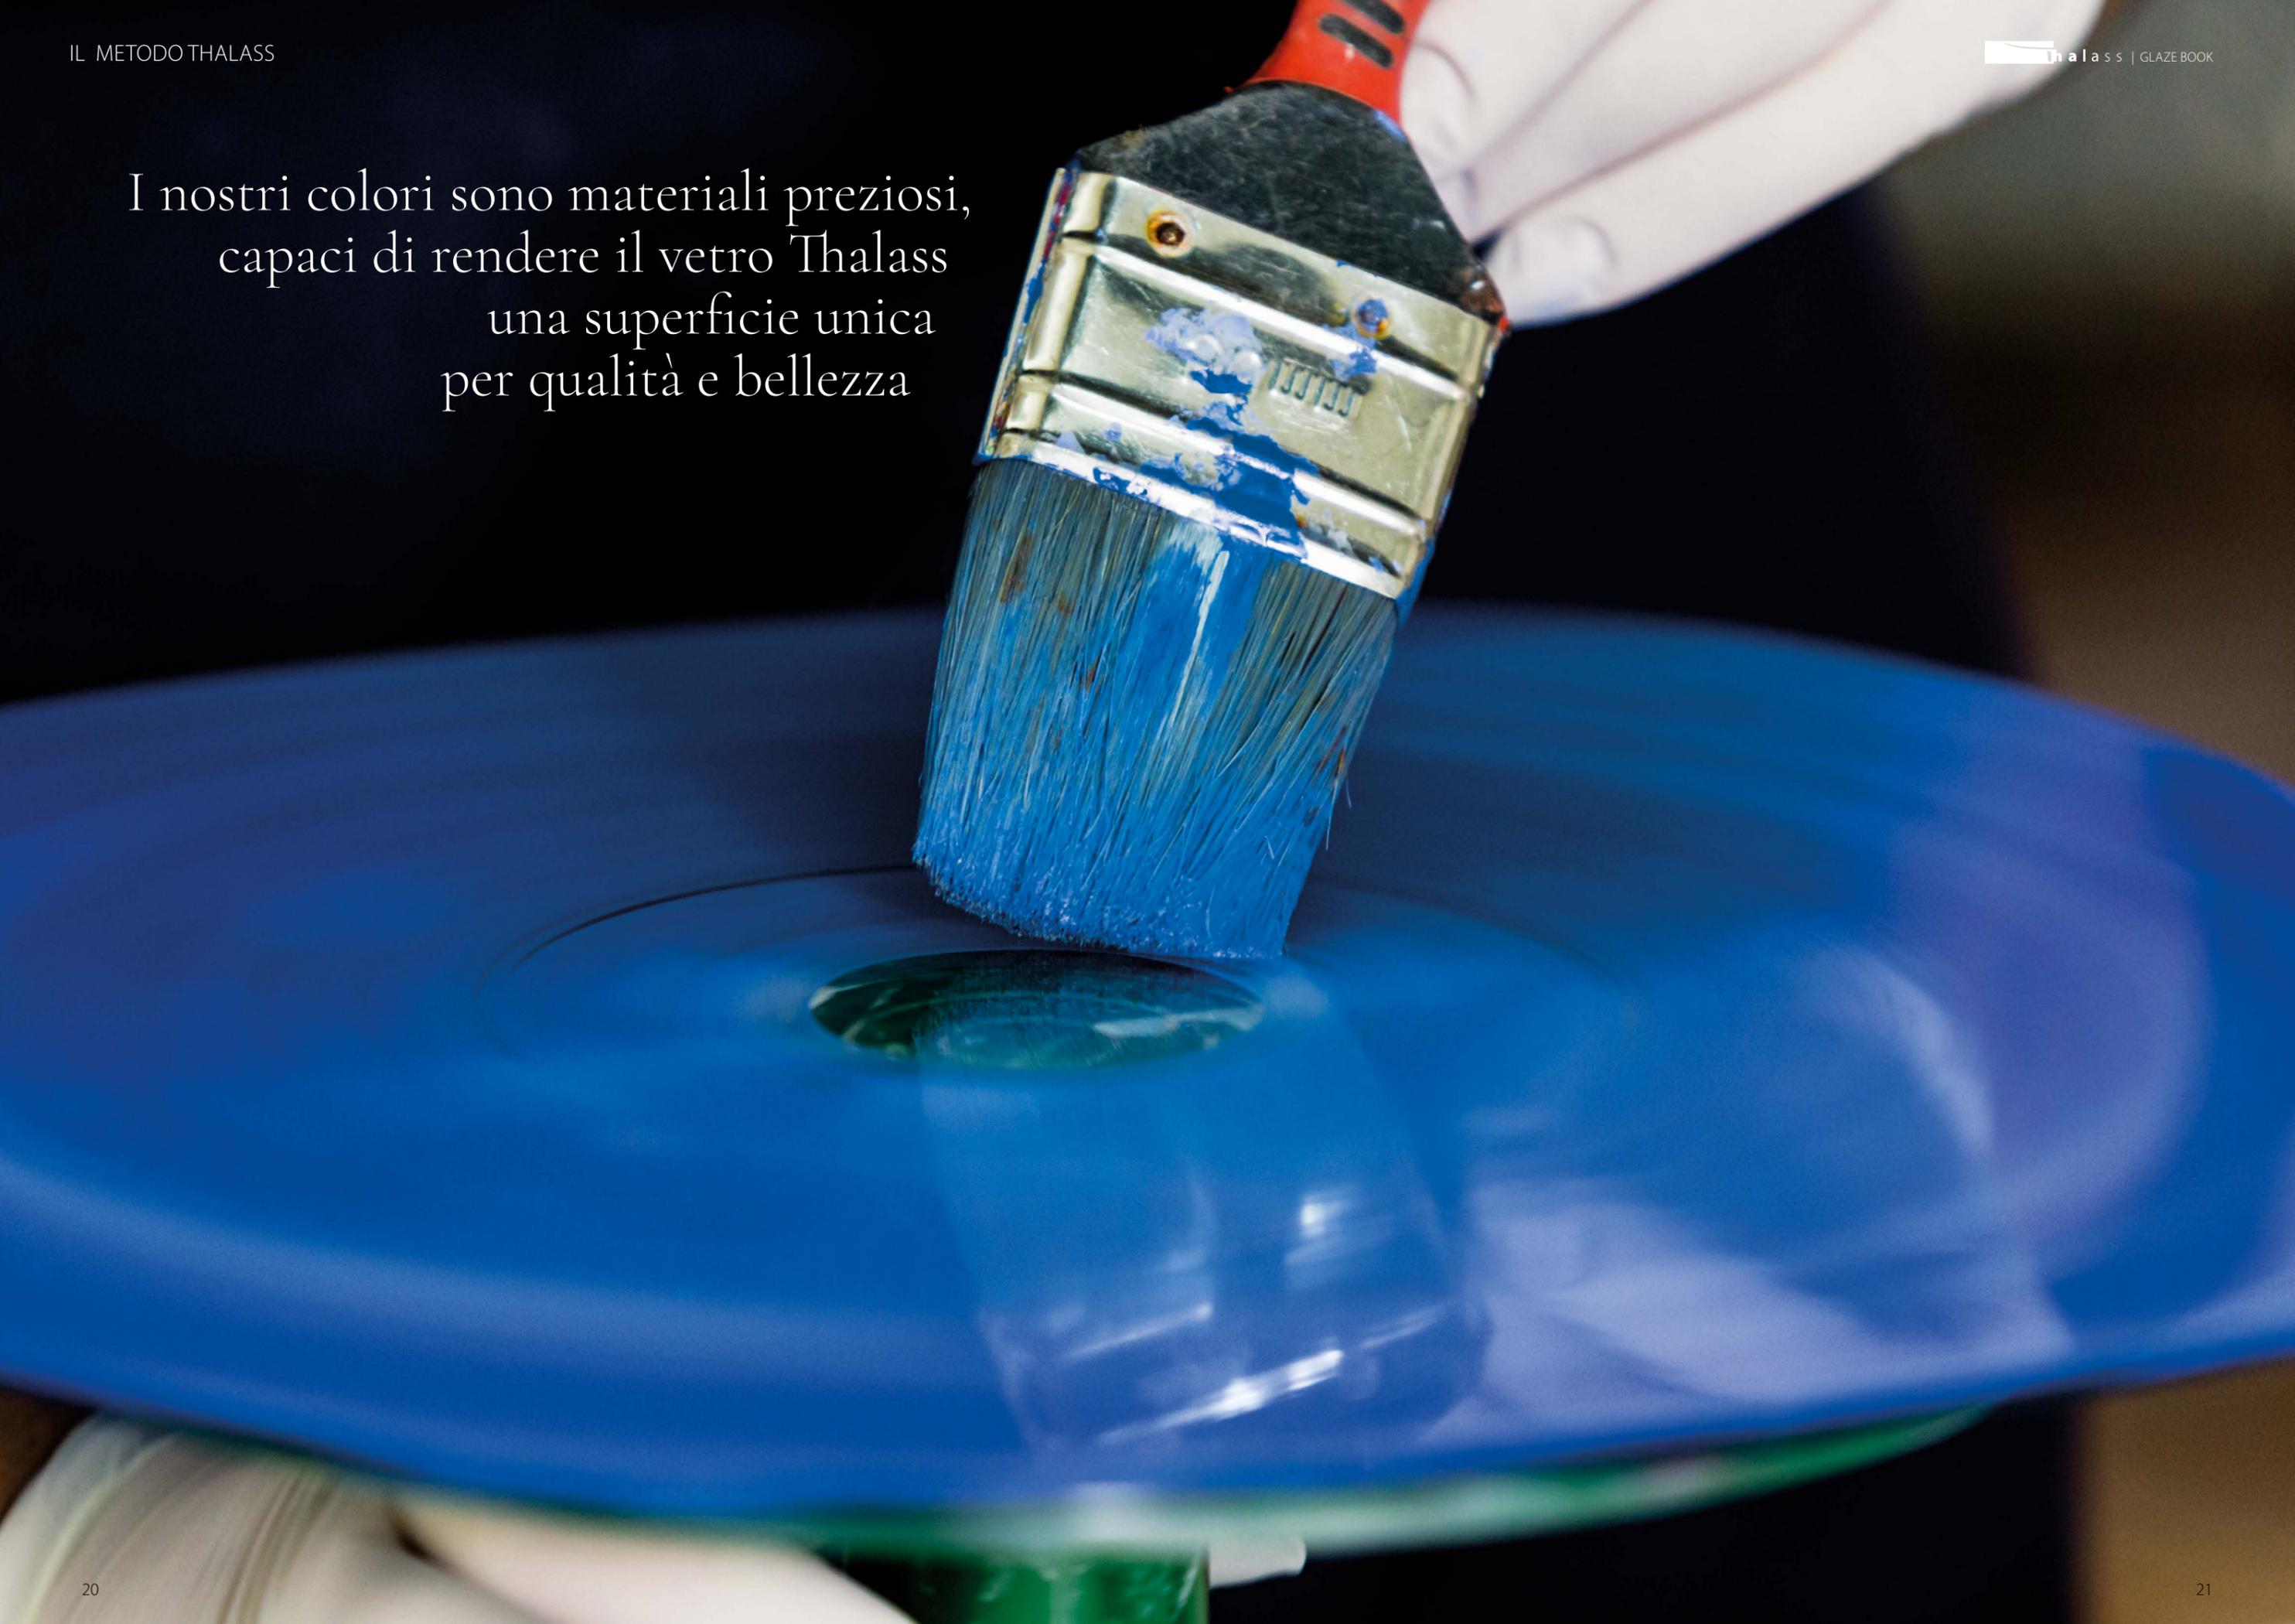

Anche questo fa parte del metodo Thalass, perché dalle nostre forme prendono vita le idee che diventeranno opere d'arte.

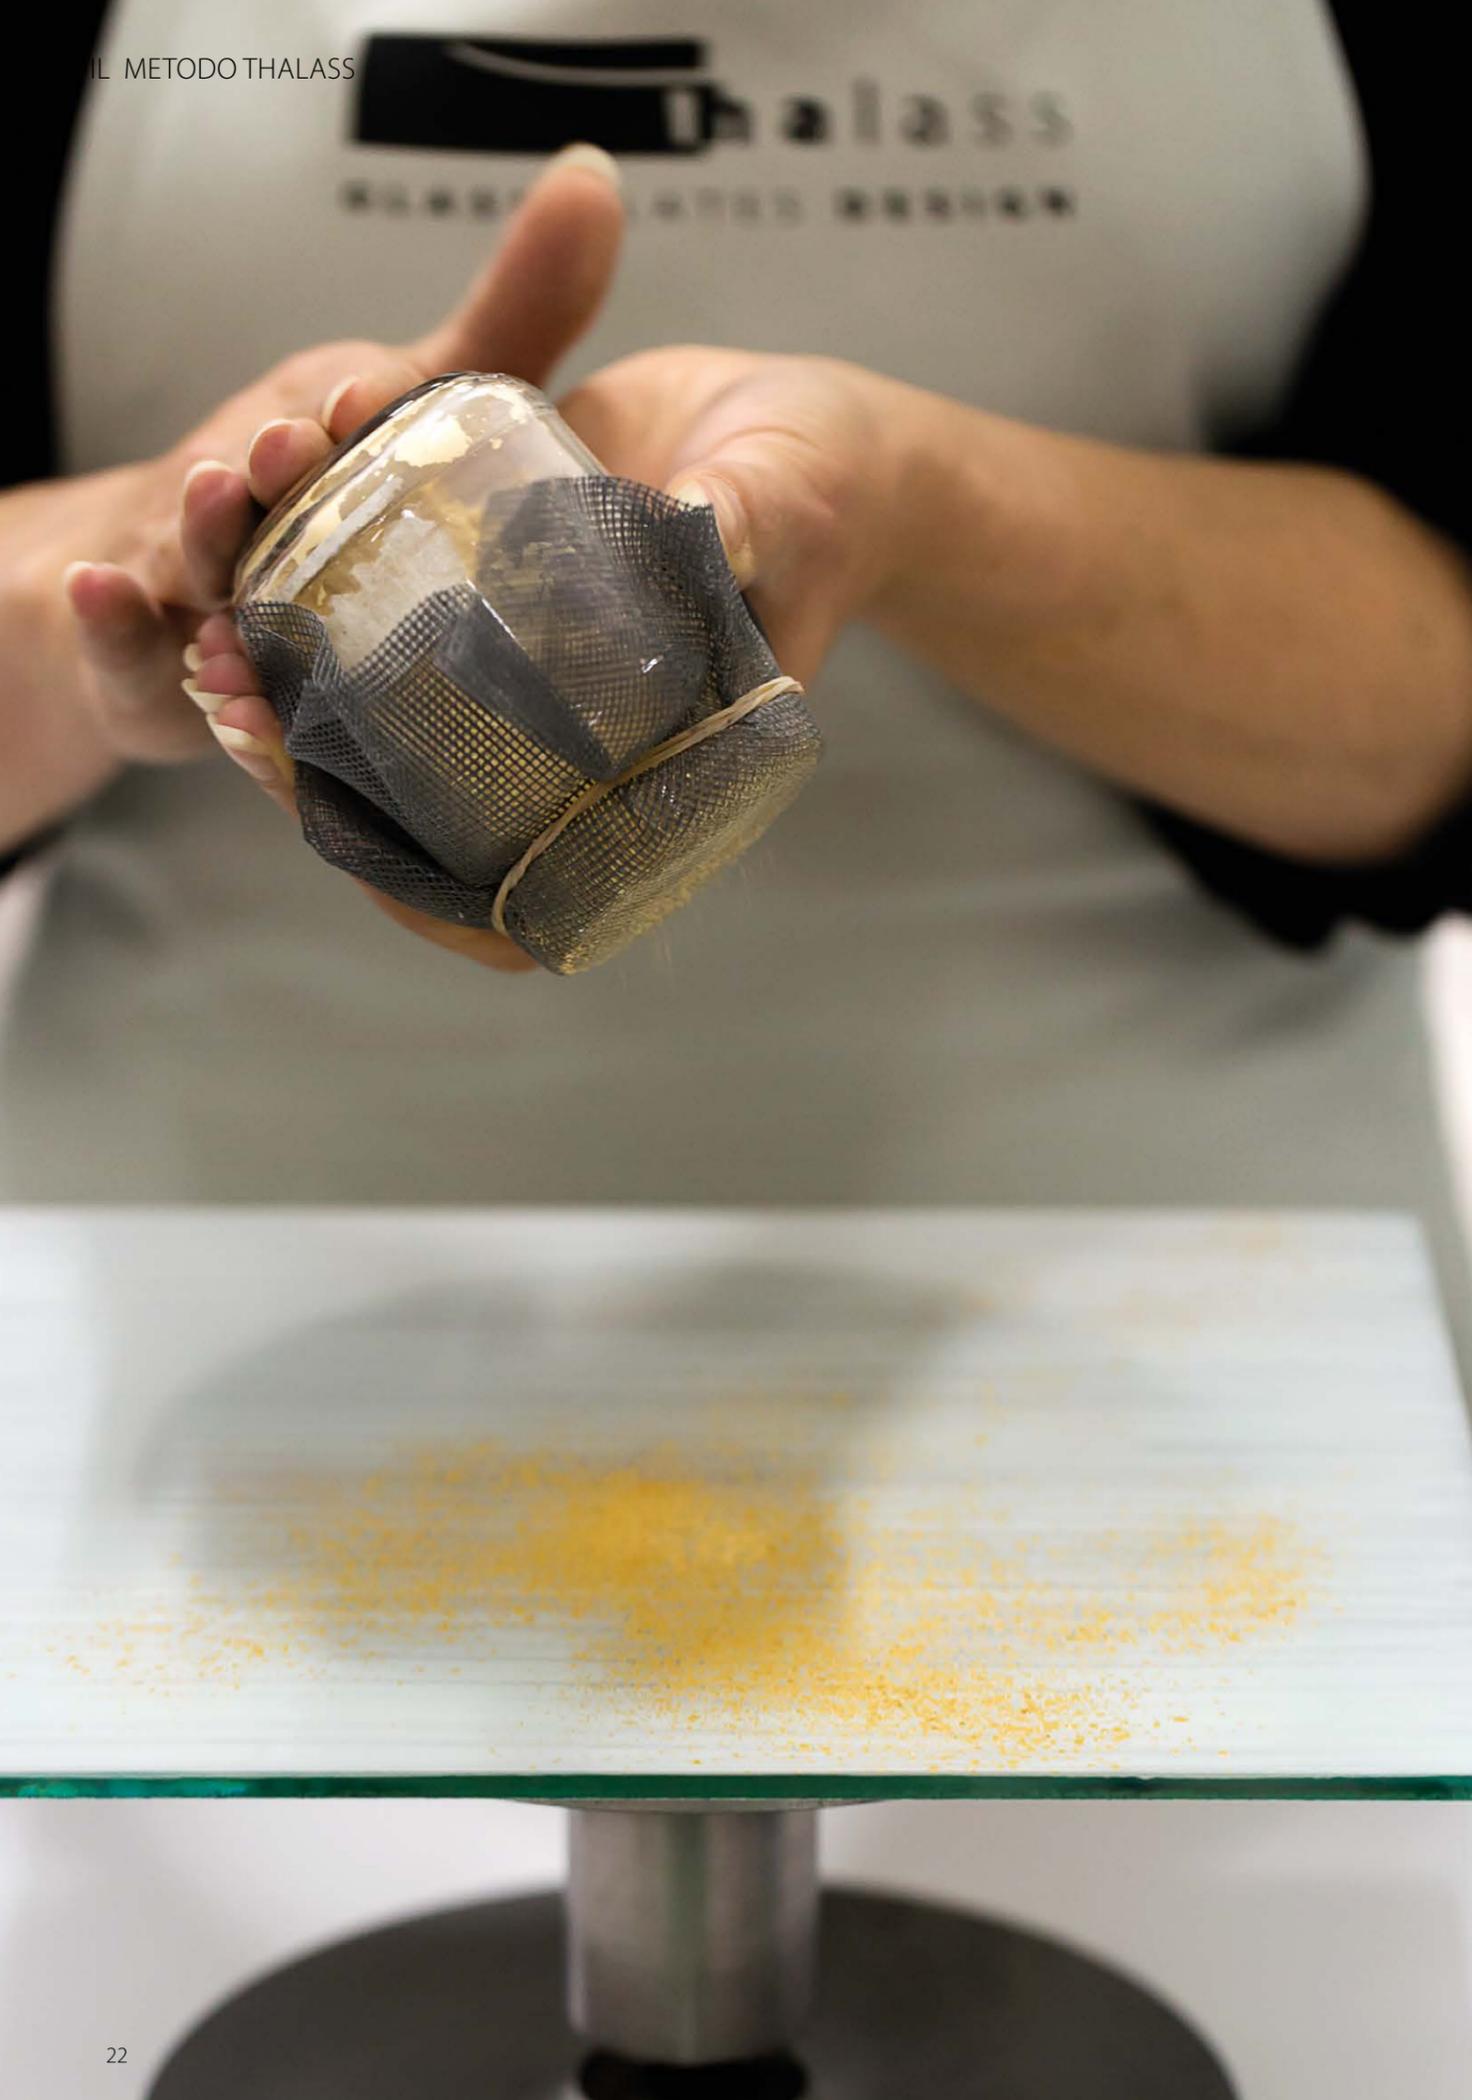

Dalla forgiatura e dal trattamento di una forma dipenderà, tra l'altro, la qualità complessiva, la resistenza e la percezione tattile del vetro Thalass.

Nessuna
opera
Thalass
è uguale
all'altra

I nostri colori sono materiali preziosi,
capaci di rendere il vetro Thalass
una superficie unica
per qualità e bellezza

Ogni maestro Thalass
decora il nostro vetro
seguendo un modello
artistico, ma sarà
l'unicità della sua mano
a rendere ogni opera
irripetibile

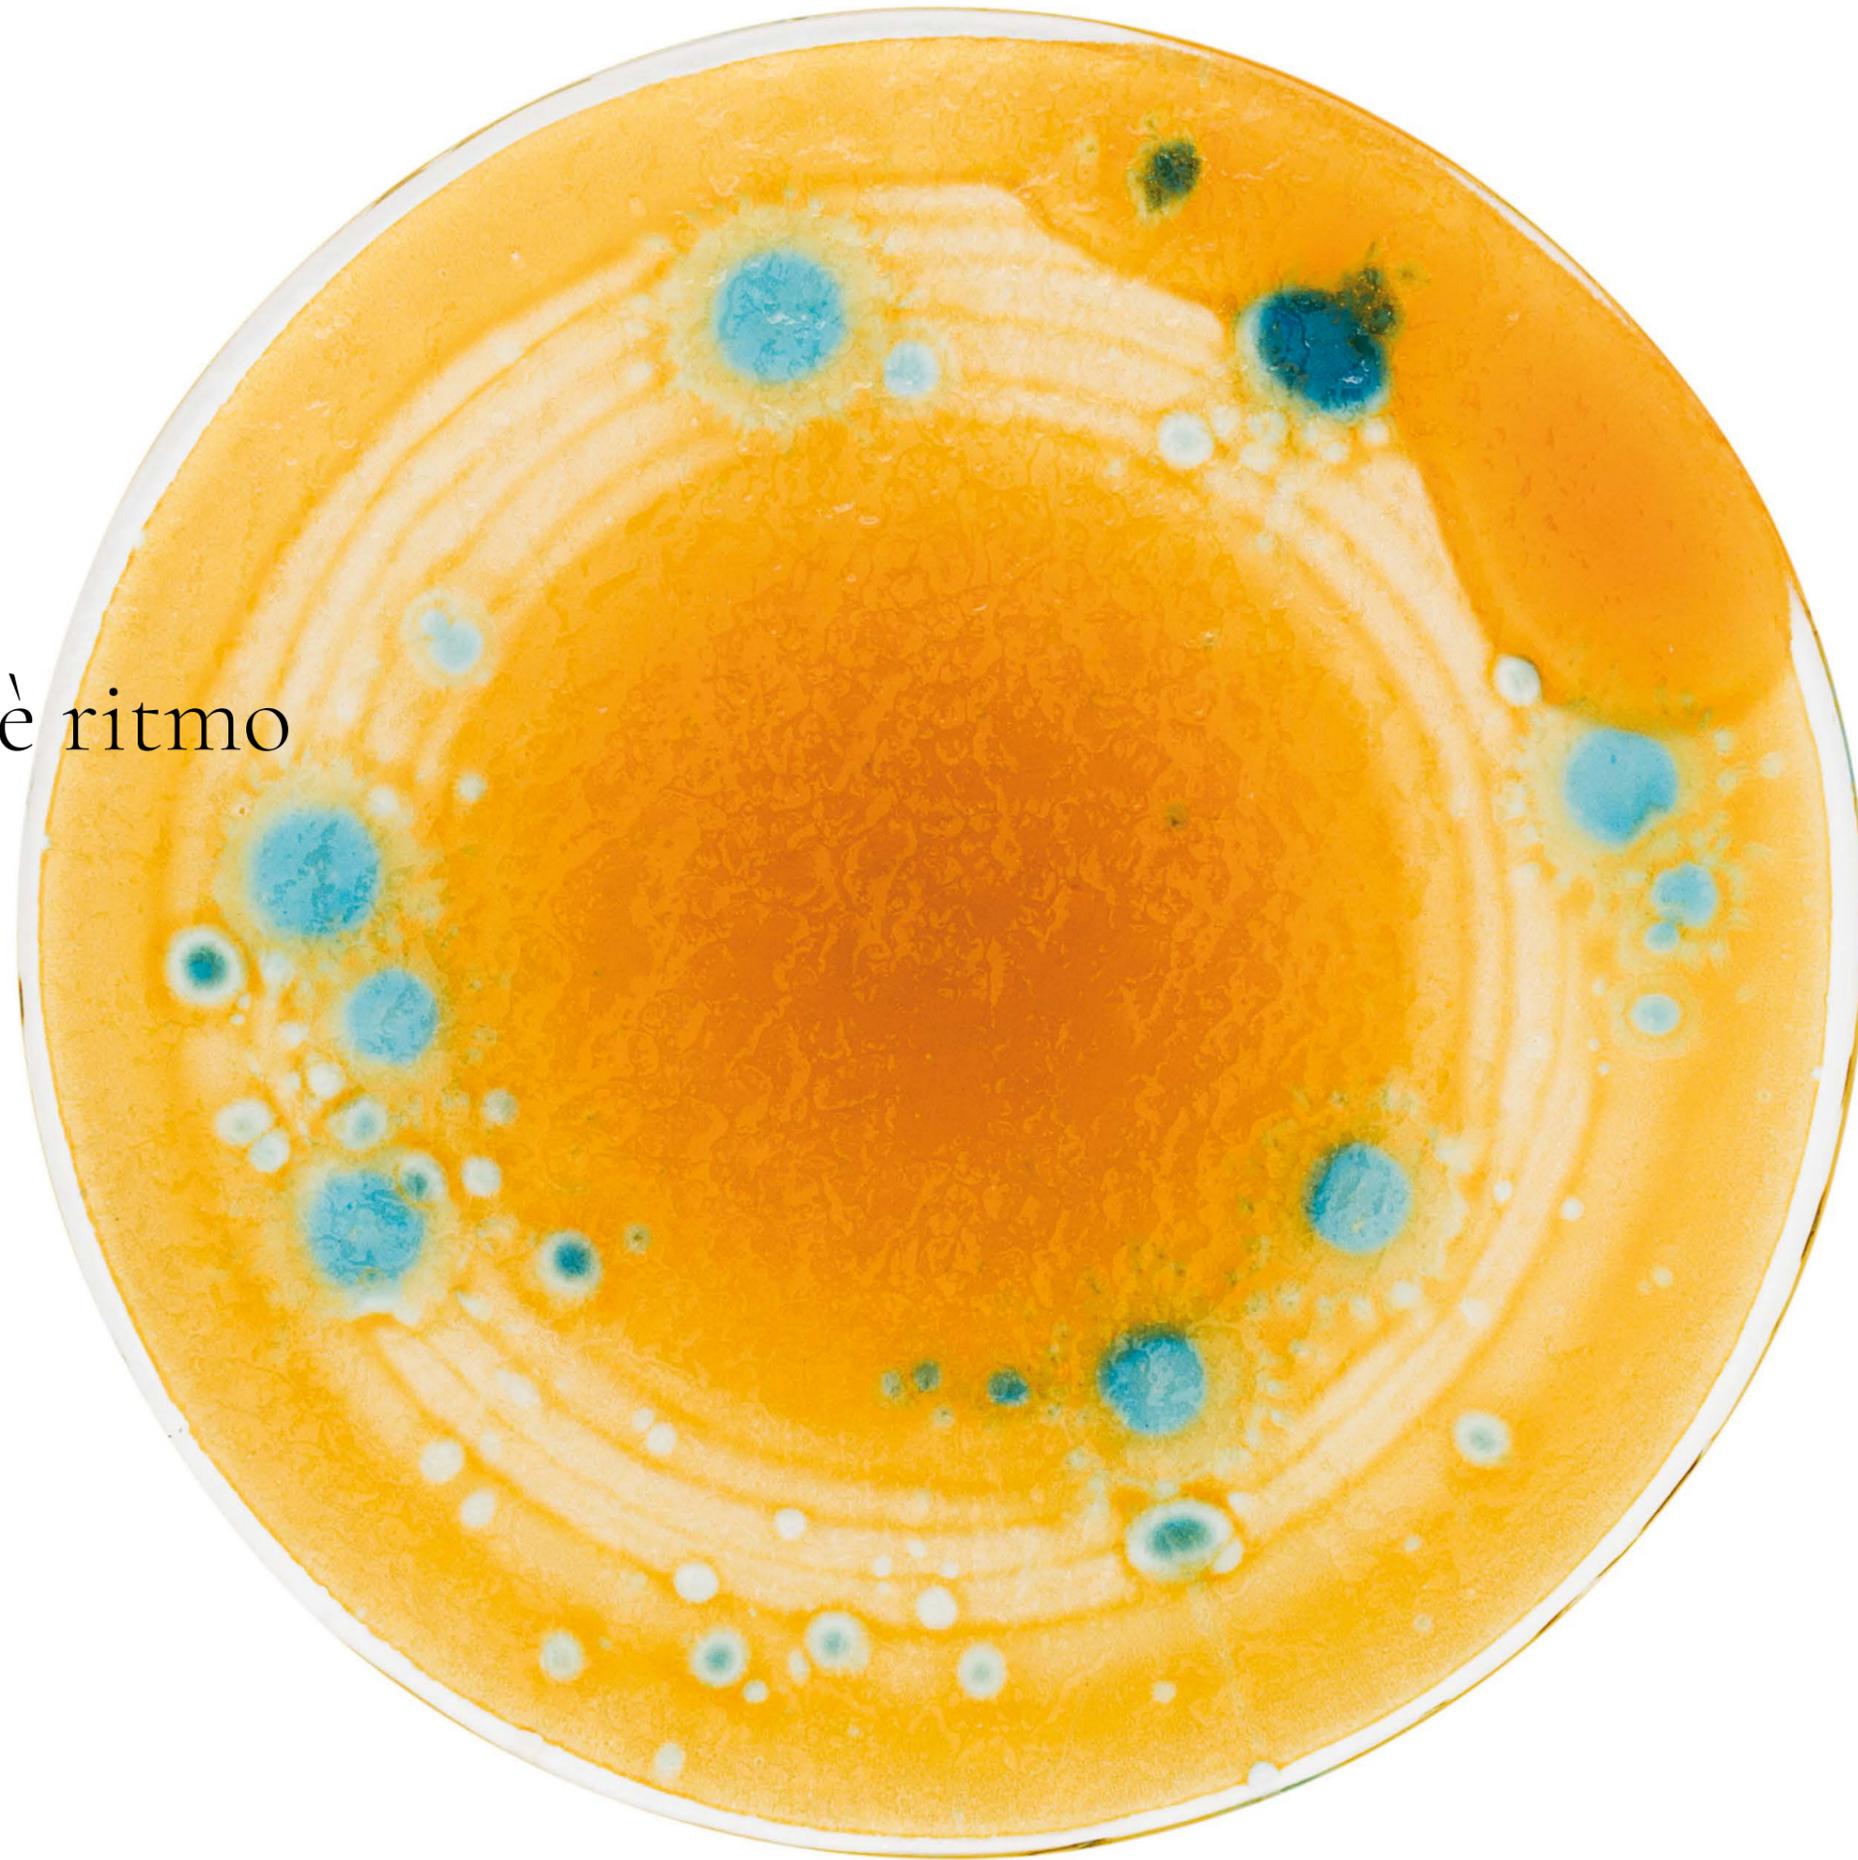

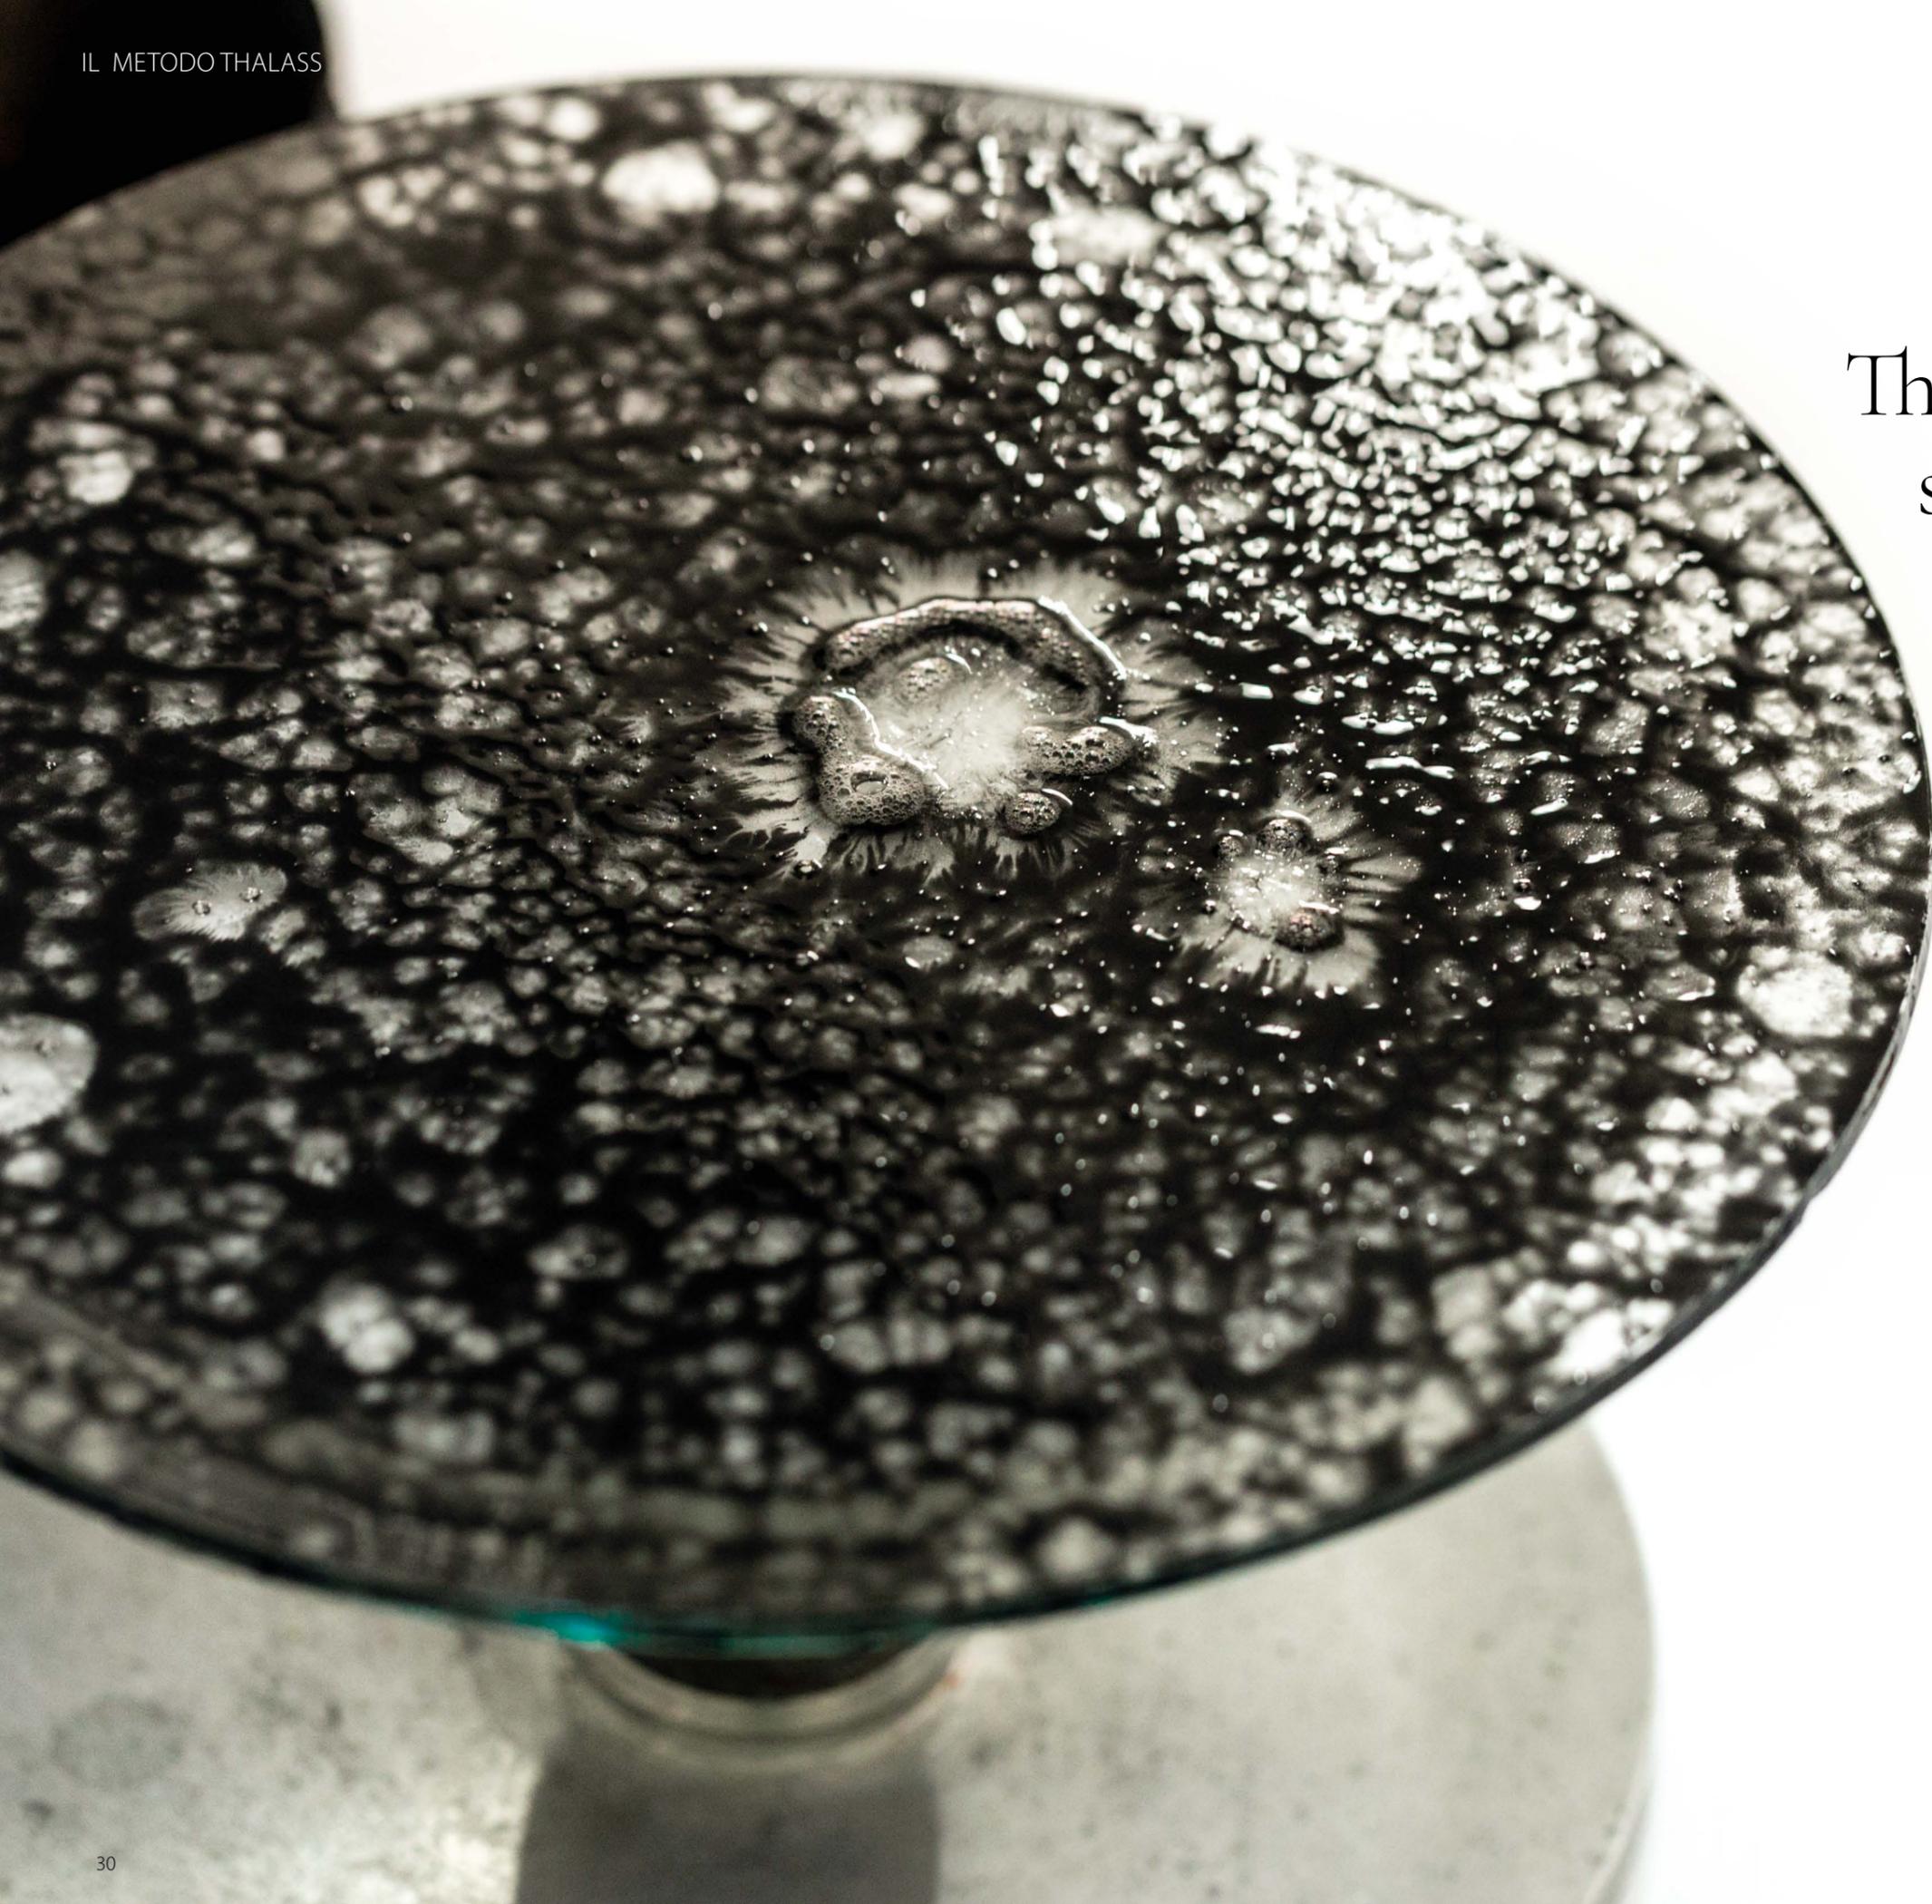

Thalass è
ricerca nella
forma e nel colore
per una bellezza
eterna

Thalass
è passione
per la pittura

Thalass è ritmo

Thalass è continua
sperimentazione

La tecnica produttiva Thalass è fatta per creare opere capaci di accompagnarvi nel tempo

Il vetro Thalass è un prodotto totalmente artigianale ma è stato creato per esprimere un altissimo livello di performance professionale che non teme confronti.

- Thalass ha una superficie che non si espone ai difetti da crepatura e per questo è un piatto igienico
- Thalass si pulisce molto facilmente, grazie alla sua caratteristica superficie
- Thalass resiste agli urti molto più dei piatti in vetro convenzionale, grazie alla sua tecnica di produzione che richiede tempi di lavoro molto lunghi e fuori dal comune
- Thalass è atossico, grazie alla applicazione del colore tipica del nostro metodo.
